

WIDOPUR 1K

WIDOPUR 1K is a one-component product,
which is ready-to-use straight from the container

WIDOPUR 1K - homogeneous and fills cracks

WIDOPUR 1K - reliable to use and economical in consumption

- For new build, renovation and repair - for permanent protection
- On surfaces and for attachments and penetrations - just pour once

The better way of liquid waterproofing – with the liquid synthetic product WIDOPUR 1K!

Product properties

- ready-to-use straight from the container
- quickly becomes rainproof (60 min.)
- adequate stability for transitions
- can be used from 5 °C to 35 °C
- walkable and withstands mechanical loads
- polyester mesh reinforcement
- UV-stable and weather-resistant
- resistant to ageing
- vapour diffusion permeable
- homogeneous and fills cracks

Delivery formats available:

6 kg and 15 kg tin-plated containers

Over 35 years
of success in new build and
renovation and repair

WIDOPUR 1K

Liquid synthetic waterproofing

Protecting a building and preserving its value are the most important things that the waterproofing of any structure is meant to achieve.

Excellent product quality and a fully developed application technology guarantee permanent waterproofing success.

WIDOPUR 1K is a one-component liquid waterproofing system on a PUR base for flat roofs and similar structural components, and for all types of connection and detail work.

WIDOPUR 1K has as its material base polyurethane prepolymer. The material can be applied ready-to-use straight from the container – no mixing or preparation necessary. Reinforcement is provided by the encapsulation of a polyester mesh fabric (G165), which is also used for connection and detail work.

The extended working time during which the material remains useable, the speed with which it becomes rain-proof and the fact that it comes in user-friendly container sizes all make WIDOPUR 1K particularly economical to use.

Possibilities of use

WIDOPUR 1K can be used on sloping roofs, flat roofs and all transitions on rising structural elements, attachments to openings and detail work for new build, renovation and repair.
