

Product information: WIDOPAN-STGM

**Basis**

Polypropylene carbonate

Consumption

1 spray bottle (0,6 kg) will do approx. 12 – 18 m²

Packaging unit

Spray bottle (0,6 kg), canister (5,0 kg)

Colour

Clear, transparent

Chemical condition

liquid

Storage

If container is kept closed and storage temperature held constantly between + 15°C and + 20°C, the product may be used for up to 6 months.

WIDOPAN-STGM is used as smoothing agent when applying the WIDOPAN-Stone carpet. It is applied to the trowel as separating agent to avoid that the binding agent in combination with the marble will stick to the trowel.

Applying the WIDOPAN-Stone carpet together with the smoothing agent does not destroy the surface tension. Using the WIDOPAN-STGM will avoid droplets forming on the marble gravel. The marble gravel will stay completely covered by the binding agent which secures a closed film on the surface. This makes the surface appear less dull.

Application

During the application, the trowel is regularly moistened with the smoothing agent, e.g. by using the spray bottle.
